

Swing Bed Q & A

What is Swing Bed?

Swing bed is a term used to describe a federal program that allows FCMC, as well as other rural hospitals the ability to keep you in the hospital longer when your doctor feels you are not ready for discharge. This allows you to receive needed therapy and/or nursing care to help you prepare for home.

Who is eligible for Swing Bed?

Three areas you need to consider for eligibility:

- In most cases you must have a three day hospital stay before consideration for the swing bed program (stay can be at FCMC or another hospital).
- Pre-approval by your insurance company
- You must have a qualifying illness/surgery

Common Reasons for Swing Bed

- Postsurgical recovery
- Fracture Recovery
- Neurologic Progression needing therapy
- Comprehensive Medication Management
- IV therapy/Central Line/PICC
- New feeding issues (PEG tube placement or TPN)
- Pain management
- Diabetic Management
